DETAILED ACTION

In view of the Appeal Brief filed on November 26, 2008, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

- (1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,
- (2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification does not include the term “computer-readable medium” as claimed in claims 26, 27 and 38.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2443

Claims 1-12, 14-34, 36-38, 45-57 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding independent claims 1, 14, 25, 26, 28, 32 and 38, it is unclear as to which of the network interfaces is referred to as "first" network interface as claimed.

Claim 1, for example, recites in part: "identifying a first network interface of the plurality of network interfaces of the node for transmitting a first data unit." In the "summary of claimed subject matter" of the appeal dated 11/26/08, Applicant cited fig. 4, steps 440 and 445; fig. 5, steps 515 and 520; fig. 6, steps 630 and 635; page 13, lines 12-21, page 16, lines 14-15, page 18, lines 16-18. However, none of those cited passages clearly explains how the first interface is identified. Claims 14, 25, 28, 32 and 38 contain similar issue as claim 1.

Regarding claims 45-50 and 57, it is unclear as to what is referred to as "first" and "second" network interfaces.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
